Stainless Steel Detention Benches

Stainless Steel Handcuff Benches - Floor & Wall Mount

GAT-FDB-100

GAT-FWB-100

Intensive Use Detention Benches are built using heavy gauge Stainless Steel construction with Optional Handcuff Rings

They are intended for heavy use in high security areas such as Prisons, Jails, holding cells, and other high security intensive use detention environments. The Detention Bench tops are made of 12 Gauge Stainless Steel with a 1 ½" flange and a #3 brushed finish. 2" Diameter schedule 40 Stainless steel pedestals are welded to a Stainless mounting plate on the underside of the Bench Top. Handcuff rings are optional and are made of Stainless Steel 3/8" Rod and solidly welded to the front/back or both sides of each pedestal if desired. The floor plates on our Floor Mounted Intensive Use Detention Benches are welded to the bottom of each pedestal and are ¼" thick 8"x8" Stainless Steel plates, with four ½" diameter mounting holes per plate. Our solidly designed Stainless Steel Detention Benches stand out from the competition and are sure to exceed your demands.

KryptoMax™ Stainless Steel Intensive Use Furniture featuring fully welded heavy gauge stainless steel construction

The KryptoMax™ Intensive Use Detention Pass Throughs are offered with security in mind. They are built with heavy-duty construction designed for intensive use featuring heavy gauge Stainless Steel, heavy grade hardware, and both external and internal latches so that the opening of only one door at a time can be controlled. The body of the pass through is constructed of 12 Gauge 304 #3 Stainless Steel and is TIG welded for a clean finish and strength. All exposed welds are grounded smooth.

The Intensive Use Detention Pass Through includes a 12 Gauge Stainless Steel Wall Flange for a finished look and tamper resistance. The doors can be offered with locking and non-locking latches. Optional features include a removable shelf and internal latch to control the unlockable side. These Intensive Use Pass Throughs are built to last and created with the heavy use of a prison control room, detention pod, or correctional facility in mind. This stainless pass through is also ideal for any prison medical ward where controlling medication handling is critical.

CLOSER LOOK

All KryptoMax Pass Through Cabinets are customizable to meet your specific needs

These Intensive Use Pass Throughs are built to last and created with the heavy use of a prison control room, detention pod, or correctional facility in mind.

Stainless Steel Pass Through

This Cabinet is manufactured with high quality Type 304 stainless steel No. 3 brushed finish with a sloped top for ease of cleaning and all Pass Throughs have an optional removable shelving feature for the easy transfer of large or small materials

High Quality Corrosion Resistant Shower Stalls

KryptoMax™ recognizes the need for high strength, durable, long lasting Intensive Use Detention and Correctional furniture. Our Prison showers are built entirely of stainless steel and provide a high quality corrosion resistant alternative to the peeling and cracking that comes with painted concrete shower stalls. Installation of our Stainless showers eliminates years of expensive sandblasting and repainting of concrete showers. Heavy-duty tamper proof drains and fixtures, along with optional hang proof curtain rods and towel hooks are just some of the outstanding features we offer. We are able to set the standard in correctional facility showers with all of our quality design features.

Installation is easy with plumbing connections that are simple to connect. Fixtures mount clean and are tamper resistant and durable. The walls are available with optional sound deadening panels to cut down on noise and vibration. Stainless steel means easy cleanup and sanitizing of the unit. Our showers are available for new build sites or retrofit layouts and can be shipped pre-assembled or knocked down for assembly on site. Custom Drain layouts, Custom Fixture positions, and stainless steel floor anchoring hardware are all options available to meet your specific installation needs.

Shower Accessories

1. Detention Shower Head Assembly combined with Stainless Steel face mounting plate for mounting in cutout of concrete shower stalls or direct replacement of existing shower.
2. Stainless Steel Recessed Soap Dish featuring single piece design mounts recessed into shower wall. Stainless Steel construction for corrosion resistance.
3. Tamper Resistant Shower Drains can be manufactured to your specific dimensions. Constructed entirely of heavy stainless the drain is virtually indestructible and installs with our available drain tool. The drain cap is slotted to prevent clogging and tampering.

Stainless Steel Cart and Intensive Use Accessories

STAINLESS STEEL UTILITY CART

Our Intensive Use Detention Utility Cart is designed for heavy use and built to provide a cleaner and stronger alternative to flimsy molded plastic carts.

The 304 stainless steel material provides unsurpassed strength, helps deter the growth of bacteria, and is highly corrosion resistant. Fully welded, single piece construction means no broken parts, warping, or cracking like cheaper materials. The double pan design allows for separate storage of food and utensils on top and bottom compartments. Heavy-Duty casters provide a smooth ride during transport of items and the two rear casters have locks and swivel for better control. Some options offered include drain plugs in storage pans for easy draining after cleaning and rinsing the storage divider grids for separation of food items or utensils. These carts are are made in the USA and intended for frequent use in areas such as jail pods, prison kitchens, and other correction facilities.

Shipping / Order Information

Worldwide Shipping Available

All Stainless Fabricated Products are fully welded and shipped on custom built crates designed to safely ship your product in a secure manner.

Order Process

1. What we do If it's a pre-designed product or a one-of-a-kind product you designed. G2 has a reputation with it's customers in taking ideas from concept to reality in a very short time frame. Many applications are custom and take an experienced team to get the job done, while displaying the highest quality of customer service and care.

2. What to expect Quality is our top priority. G2 will stand behind it's products 100%. No matter what the warranty period may be. We are completely dedicated to our customers and there needs. Our reputation is what has made us what we are today.

3. Engineering Staff Our inside sales team will work together with our head Of engineering to find the best solution for your needs. Engineering will then supply a quotation to be released to our customers. This quotation will be detailed in price , delivery, & warranties.

4. Professional Quotation With in 24 hours of your inquiry in most cases you will receive a quotation via email for the items you requested. This will come in a .PDF format for your review.

5. Purchase Order is Received Our inside sales support staff will confirm all items and send a order acknowledgement. This is to ensure our customers understand the terms and conditions of our order acknowledgement

6. Product Specification Sheet and Drawing Sign Off You will receive a product specification sheet that will need to be filled out along with a completed detailed drawing of the product you are ordering. Once the sign off drawings have been sign off on then the order will go into production. All delivery times are started once all information has been cleared and sign off drawings received.

The Product Is then Manufactured & Shipped

Every G2 product is cleaned , shrink wrapped, palletized , and crated for shipment. All of this is included in the price of your product. We also weigh every item shipped, along with taking a picture of the weight scale showing the actual weight to prevent discrepancy with shipping companies.
